

TOBEY LUCAS – Band – Technical Rider 2015 (17.06.2015)

Page 1/2

We don't have much technical requirements, but it would be great when the following is fulfilled. Please read this document carefully and let us know if something is not possible! Thanks for your support!

STAGE: (see channel list & stage plot on page 2)

- Stage size: min. 5m x 4m, dry and clean
- Drum Riser: 2 x 2m, 60 or 40cm high
- Key Riser: 2 x 2m, 40cm high
- Microphone stands in good condition
- 3x empty flight cases for raising Guitar/Bass Combos
- 230V power with T13 sockets

BACKLINE:

We always bring our own instruments as long as nothing else has been agreed.

MONITORING:

- Min. 6 wedges on 6 mixes (if only 5 mixes possible, Bass & Drums can share)
- Additional sub for drum fill!

AUDIO CREW:

Normally we are not travelling with any engineers. If we do so, we'll let you know. Please make sure you have a local crew who will support the Band during Soundcheck and Show. They should be familiar with the equipment and do a decent FOH/Monitor Mix. Thank you very much!

BACKDROP:

We bring a **5 x 3 m Backdrop** that looks really fucking awesome. To make sure everyone can see it bright and shiny we bring **2x EUROLITE LED BARS** (yeah, some cheap ones from Thomann, but they do the job). They will be on the floor and plugged in directly, no DMX connection needed. We bring all the cables.

LIGHT GUIDANCE:

The Tobey Lucas Band is very dynamic. From classical Americana Songs to up-tempo Pop/Rock/Country pieces, everything is in there. We can provide a setlist with some advice.

Two things that make us happy:

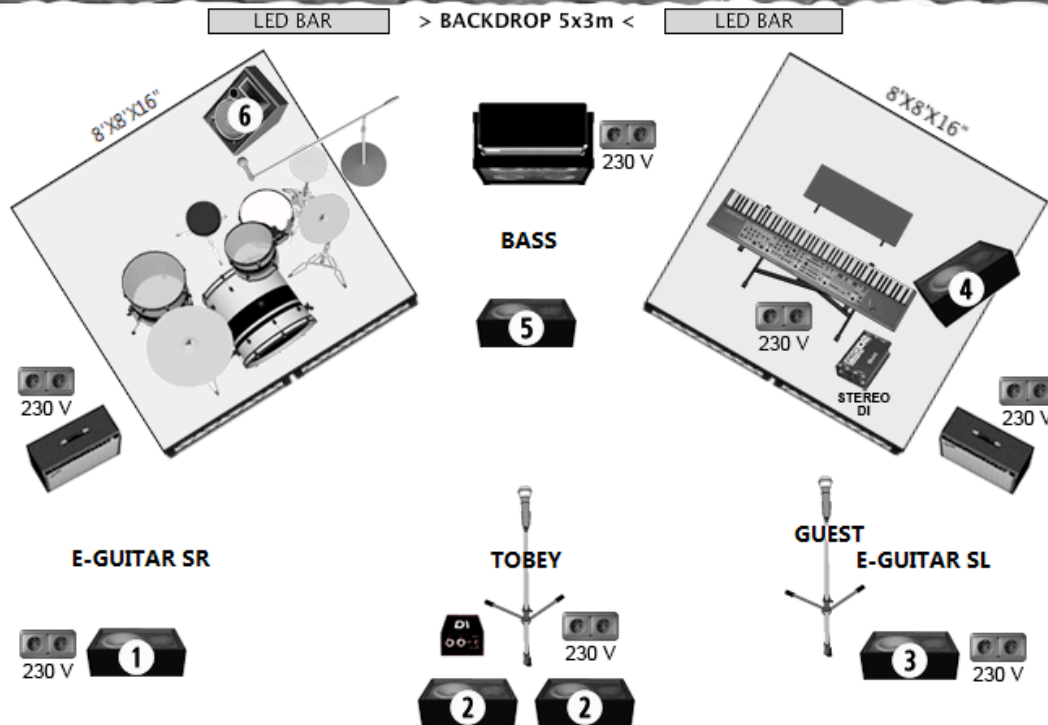

1. Black out after a song is finished and
2. When everyone on stage can be seen (yes, even the drummer please).

Feel free to bring in your own ideas as long it fits with the music. We are no light operators.

... please see page 2 for Stage Plot + Channel List
